mongod (MongoDB)
Search Service
nginx
hold phase (steady state)
a CPU per container, 1 Search replica
logical cores (host: 12)
1 VU
10 VUs
50 VUs
100 VUs
host capacity: 12 logical CPUs
Search + nginx ≤ 0.40 cores
b Resident memory per container
MiB, log scale (available: 9.7 GiB)
Seconds since the start of the k6 run (shaded: 30 s hold phases)
c CPU cost of one query
server CPU per request, core-ms
mongod: 94–97 % of the server CPU of every query
